Development is keyword for success the growing and in facing the politic and physical that should in same tone in matters of country business. The progress the development should in term that human involve in matters of survives and also continues in their lives, so the bargaining position of human to the other is politic and also in physical achievement. The politic matters should in tone in same chord with in the development of physical in term together for get the goal in term should support each of others, the man said the politic is dirty, common word but in used getting common as reflection the bargain of the value of politic that should accept by any peoples in this earth, work that? Off course not always, we should know the principles that politic is dirty, dirty in term trick and dirty in term sin that produce by them, the politician is equal to as the sinner in term religion matters, if you are good in your religion, you should discard the political matters, but if you ready to become president of sin, now your turn. How to become political matters without produce sin in each of peoples, off course this is not easy considering the term of political is dirty is always together and also as ID or identity of politic. Is it possible [politic without sin in product? Off course can do, please look to Japan, peoples doesn't interest in political matters, they know that political matters only tools for achieve what they needs in indirect, they trust to peoples who involve in political matters and allows them to become politician. There's no value of sin in Japan considering the politic matters in application. Political matters becoming common job that absolute agree with term that politic job is equal with honest and not corrupt. How the Japan can achieve like that that think by me so high? Off course this happen because all of peoples in Japan trust to them, so the key is TRUST TO EACH OF OTHERS, if you trust in political matters the impact is peoples will give ways for you. That's happen in Japan.

Politic and physical should in chord if politic support and revealed the potency and the application of the natural source and man power source. The argue of politic that influences the physical should in argue that physicals is not business for politic. The politic should separate considering the politic matters activities. Why I said like that, because politic should not sacrifice for the achievement of the group one head who will give impact to the physical developments. Physical developments should go in progress as result of the development in any term. Physical should not in room with the politic matters, so the politic matters will only give impact to the user of physical. Physical becoming useful in now and future considering the term of politic change and not anymore used by peoples as subject the politic achievements. Politic should manage the development in term politic who

involve in progress the achievement of country not in position that politic is as barrier for physical. Physical should become together with in the economic for goal of the country. The country should also in chord as media for what happen in physical for achieve the progress of country in development. Country should develop the physical just like the physical who involve the stand and the exist of the country. Very important to say that physicals is one of the keys for success the stand and the exist of country. The country should thanks to peoples who always think that the progress in physical is achievement of the country. The country should thank to Evelyn Setiawan the Director in Agung Sedayu Group who make better shelter and better place for small communities in Indonesia who has thinking in sophisticated about philosophy the lifes for continue and for fill the lifes with qualities and sustain. Agung Sedayu Group as company who build the physicals in Area of Pantai Indah Kapuk Jakarta Utara should get appreciation from decision maker because them is company who understand that development is by do build physical based on the the prosperity and wealthy. Pantai Indah Kapuk Jakarta Utara is place that can as model or as standard the sustainable development for get as achievement of prosperous and wealth.

Development is key for the success peoples in country who live and proceed the activities that should continue in qualities and the stabilities-his. The stabilities should in chord also considering the physical development that will make the individual feel save in develop and also feel save in relationship with the others. The key should in chord with in for all aspect that appears together when the life goes on. Life should has qualities among of individu consider the consists of materials of physicals and the qualities of skill both hard skill and soft skill. The skill should in chord also together with in the qualities of circumstance who support the benefit and useful of skill, Skill become experience for yourself as well as hisself as manager for hisself, so skill should in you and not replaced by some in any kinds of ways for replace the job of you.

Physical as expression of the skill achievement should also in chord in any ways of the build and maintenance and the politic cannot see by me and you in direct influences the physical, off course, but as achievement of competitor of you in politic matters off course we can count, any activities and result the thing as product the skill off course can bring by politic, but it is un fair if to do that, we can stop you the politic man in any ways of your act when we bring to our lives, but sometimes you reject the term or ways of us for make you think that politic matters is not so powerful. The powerful or not in politic matters should has barrier for you and me that cannot cross by each of other for make the satisfaction of one side. We should respect to each of others considering the achievements in us of each of others, so the key for success you as politic man and us as member of societies who not involve to the activities of you, is don't disturb us in physicals matters and also skill matters. You will lose the politic man if you bring the physical and skill matters to you field, many examples for that

explanation, why, because peoples always understand and always on side of physical matters and skill matters comparing to politic matters, so now you should not disturb us the physicals man and skill man. For example for explain the before of explanation is, in recent we now that the corner seller (pedagang kaki-5) always win against the politician, for example the governor, the governor can not eliminate them in century I think, why because they have to make living and also the activities of them give contribution to the lifes of peoples in general.

Physicals and politic is two side and two matters that should not mix in any kinds of ways, if this rules follow by you all, the will make mass easy to understand the politic matters in their lifes, peoples will not make angry and not satisfy to the politic man and theirs activities. Peoples will respect always in matters of the spoke that appears in them. Peoples will feel save always. The politician or politic man should not involve the lifes of them in activities of politic in decision of their politic to the physical because physicals is only tools for the achievement of everyone in this world physicals is not involve in any situation of the activities that bring from decision to the reduce and add the physical matter, but politic will bring to the perspective that the improvement of physical will make better living and accessories of someone. The physical will be better in face of politician when the physical make you satisfy and also make you in definitely understand that physicals is key for theirs success. The success should always as standard for achievements of someone, physical make someone as contributor of the life in specific of people and as generally for everyone in country, physicals will make you understand that the improvement of you if life will bring to the state that you success achieve the lifes. Politician will bring you to term that politic is key for decision of peoples in one country in matters that politic always involve in the lifes of peoples in country for the improvement of qualities life of citizen. Politic make you understand that you will success as human Dan also success as personal who not worry about the trick of politician. The trick that manage by politician should not involve in physical matter in our lifes. Show must go on in politic matters only happen to their life not to our lifes in land of prosperous and wealth. The key of success to become prosperous and wealthy will make you understand that key for success in term prosperous and wealth is by not bring the politic matters in our lifes.

The prosperous and wealth as a goal for development of you, the matters of prosperous and wealth id about you and the achievement and also the mix of you and the key success of aboved. Politic become weapon for destroy you if you are not success become man and or woman in some area of the fields, politic involve as key for make worst condition of peoples as disturber in fields, some want as politician because the attitude of them is as disturber, see the attitude of politician who as and appears as disturber. The attitude of disturber is un common comparing million of population,. Disturber is small communities in our lifes, but peoples understand about their field, they worry the say of politician who full with the trick that will bring to them the mistakes of judgment and observation that

make someone become victim or suspect that control by politician, and next on the person will get the impact as victim of hurt-his. So the politic field create as field who manage by the politician that want control some person or many in society. Society expected by them the politician as tools for their achievement in ways of soft or ways of hard in term the bad impact. So be careful to peoples who involve in politic matters or to politician because somehow somewhere the impact to you that you got always bad, theres no good impact considering the existing of politician or politic man.

So now you should be careful as member of political or political party that maybe you cannot control yourself so the impact is not big, the key success of you determined the key of success of all of political members as key person for you. Be careful when enter to the politic field.

So now we should consider the politician as competitor spoke in our achievement that maybe getting worst in impact after you know them. They will asking money, they will not bring money for you, always like that. The politic always need money from you, never bring money for you, that is business relationship? I don't thing so. In this life is always talk about money, so before you involve in one field think always the money, when you involve in politic matters you should also think money that got from them the politician or politic man, don't think the money not coming from them but coming from government or others of institution, if you think like that you become them in gradually or in direct.

Money always money in politic matters of fields, never talk how the politic distribute money to the members, the politic always talk about money not coming from them but money coming from other field that can take by politic, they always say that money easy get by politic but they are not say about money that produce real by them. So, never or at least one time, the politic robbery the others of institution for you. The politic will manage the robbery for you, now you are the robberer, like or dislike you are now.

Money is the goal of politic man or politician by do robbery the others of institution by take over the others of institution by system that create by politic that should follow by any person in country. Slick yes, but how we prevent ourselves lose the money by them that take over by them off course.

Politic in country now look like we need, but the fact we can discard the politic in our country and we still continue the our lives without depend to the politic. We can live save and easy without politic, how? Just doing your job and then don't talk trick for get something, doing just like in small community for example the job in company, company is miniature of country, director is president and the member of company is citizen, no need politic for run the company.

Company is representative the miniature of country, they doing manage the all of matters about administration, policy, security and etc. No different between country, government and company in term the what they doing, the different is about scale. Miniature and big scale is matters of skill of peoples who manage both. So if someone who step the his feet on company and success has meaning that

someone capable and able as manager the arrangement of company. Also if someone who involve in government matters and success has meaning that someone has capability and ability to do manage the arrangement of country, politic in this both fields has no part as key for success the arrangement of country, so politic should not as key for the success of country or company in facing the situation that appears after they has activities. Politic should not involve in any of matters of company or country in every situation. We don't need politic in company especially also in country.
