

He lives on in your life and in

From his Freshman year, Steve's teachers and classmates placed him among the best in his class. Throughout school he excelled in advanced mathematics and science courses. Steve did well not only in these classes, but also in the competitions of the AHS Mathematics Team, Chess Team, and Science Club. Outside, Steve enjoyed playing tennis. In the fall of his Senior year, under the early admissions plan, he was accepted at Bates College. On the morning of February 4, 1967, after a short illness, Steve died.

"Steve was a top scholar, who won the distinct honor of the Bausch and Lomb Award for our best record in science for three years. More important, however, is the fact that he was "tops" as a person. He was a complete "gentle-man" of stature and fine character. We are all poorer with his passing."

—Mr. Miller

"Working together with Steve in the Junior Red Cross Council, I knew of his willingness to give his time and knowledge for others. He lived the present with understanding, consideration, and determination. He looked to the future with youthful enthusiasm and hope."

—Nanette Ciano

"To me Steve was always someone I could count on, as a classmate and as a friend. Through classes we shared, through the Mathematics Team, and through several afternoon tennis games, I learned to appreciate his sincere, intelligent, and well-balanced character."

—Francis Chang

"In this murky world, Steve McLean's words, like his character, rang clear and honest."

—Mr. Pratt

"A gentleman and a scholar—a natural mathematician. Steve was my protégé and he will be sorely missed. He certainly left his mark with both his classmates and his teachers."

—Miss Hutchinson

"Steve was an excellent student, a fine citizen, and most of all, a wonderful guy."

—Paul Cavicchi

the lives of all that knew him.

STEVEN DOUGLAS McLEAN

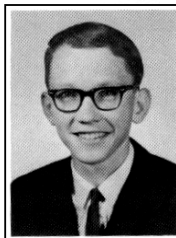

1949-1967

"I suggest that teachers should be willing to discuss differences of opinion with the student at no penalty, to show the student why they disagree, and to encourage him to bring up material that questions the validity of the subject matter."

The faculty of the Cutter School is presenting an electric stroboscope to Steve's father, so that Mr. McLean may donate this apparatus to the Arlington High School Science Department in Steve's name.

In recognition of outstanding academic achievement, good character, and superior intellectual promise in the field of science.
