SP2500R 10/100 Adapter
This is the most convenient method for users to access Internet wirelessly. SP916A Wireless Broadband Router can connect to DSL/Cable modem so that it can provide wireless stations with Internet entries. SP916A itself is an access point, router and 4-port 10/100Mbps Ethernet switch all in one. It's most suitable for home or SOHO users to get access to Internet wired and wirelessly.
