RECENT RESEARCH**

Dear,

Officially I publish my research to you even only the title, but I believe you will understand, please log on to address:

<http://www.geocities.com/anraninstitute/ATEPNURDJAMANTHERANINSTITUTEhottopics.htm>

Or indirect through address:

<http://www.geocities.com/anraninstitute> then click *Hot Topics!*

to see my publication considering the increasing of sea water level not because the melt of north pole and the south of pole only *but the most of is because* the nature produce the additional water as side effect of water cycle system, this process as major system who make the increasing of sea water level compared to the melt of north pole and the south of pole. In that address also mention the others of my publication that tell the key of global warming.

Thank you very much, maybe interesting for you, I am:
