

Theories proposed by EN Group Members

These theories have been proposed by EN Group members and are available to all EN Group members in our Files Section. The reasoning behind each theory is explained at the EN Group site.

It is our hope that a medical researcher will be inspired by our theories and investigate those that have the most promise to expand our knowledge of EN and find an eventual cure.

1. Treatment to rid us of EN immune cell clusters
2. Antibody Theory
3. Pulmonary/Cardio Circulation Theory
4. Chronic EN and Cellular Debris
5. Compromised Skin Theory
6. EN and Sarcoidosis Theories
7. Histamine producing bug bites to "fool EN"
8. Histamine Theory
9. Hormone Modulation Theory
10. Hyperbaric Oxygen Theory Treatment
11. Immune Cell Cluster Theory
12. Injury to legs preceding EN outbreak/theory as to WHY
13. Integrated EN Theory
14. Mercury or Amalgam theory
15. Nicotine Patch to Treat EN Study Suggestion
16. Progression of EN Theory
17. Strep induced Genetic Flaw Theory
18. Strep-EN-Sarc. Connection.doc: A Genetic Theory
19. Stress and Immune Cell Cluster Theory.
20. Stress Hormone Regulator Treatment Theory
21. Can excess cortisol [stress hormone] trigger EN?
22. Sugar and Inflammation Theory.doc
23. Sunshine vitamin D Theory
24. Teeny bacteria a cause of idiopathic EN (Sarc. and Crohn's)?
25. Theory on EN Migrans
26. Vitamin D malabsorption Theory
