

Mr S.C.JAIN  
HEAD  
STRUCTURES  
ENGINEERS INDIA LTD  
1,EIH,RK PURAM,NEW DELHI

## LETTER OF RECOMMENDATION

I am very pleased to write this letter of recommendation for Mr. Gaurav Moudgil and glad to know that he has intends to pursue his Masters' in Structural engineering at university of California, Berkeley. I have known Gaurav for about 2 months in the capacity of Head of Structures, Engineers India Limited, New Delhi. He received the In House Training worked at the various companies' sites. He is very meticulous in applying for the Training after his semesters and was always offered the Training at the Company's' Research and Development Center at Gurgaon, Haryana. During this period I have been able to closely interact with him and have observed his capability to quickly grasp the concepts and efficiently implement the same to solve industry's engineering needs.

Gaurav did a number of structural designs and analysis at the Structures department at EIL for a number of large-scale projects. He did the structural analysis and design using STAAD for the Fist Aid Center at Oil Refinery of Indian Oil Corporation Limited at Panipat, Haryana. He was also engaged in the Design of Underground Water tank for the same under me. His inquisitive nature, presentability and dedicated hard work are commendable. His work as a trainee gained overwhelming praise at the company. He follows up persistently for the task undertaken and put in as much hard work as required. He has often approached me for my assistance and guidance in clarifying his doubts and even in the absence he is quite instrumental in getting the problem solved. His analytical and mathematical ability are beyond comparison. He has been gifted with the capability to crosscheck the structural calculations manually is overwhelming.

A fast learner, he always impresses me with high energy levels. He used to spend a lot of time at the site also. His work as a supervisor at the Apparel International Mart was excellent. He also underwent training in Construction Management Techniques in EIL. His report on the Rain Water Harvesting System and advanced construction materials at the Apparel Export Promotion Council site during his training period in the Company's Laboratory was professional. Gaurav combines intelligence, constancy and persistence to achieve required solutions. His creativity and farsightedness while carrying out his project reflects his clear understanding on the topic. He expresses himself persuasively and effectively. His technical skills in the field of computers can be compared to any core computer engineer. I am looking forward to his joining my team at EIL as a Structural Engineer but his strong inclination towards higher studies in Structural engineering is unbelievable. He has impressed me not only by his depth of knowledge but also by his honesty, integrity and dedication. He has very strong parental values behind him.

I strongly recommend him for Graduate Program at your esteemed university. Knowing well, that he is capable of exploring the boundaries of his knowledge and represents a rich and simulating diversity of challenge and experience, I can vouch for his capacity and in getting maximum possible financial assistance as well.
