*"A family that plays together, stays together!"*

Spring has sprung! How about adding a few new activities to your family fun? We'll feature great outdoor activities ranging from a rousing game of kickball at a nearby park, to building an obstacle course in your very own back yard. And if the weather turns bad, we've got ideas for indoor fun too—how about puzzlemania, an indoor picnic or some great dinner games to enjoy together. Our activities are inexpensive, easy to do and most especially—fun filled for your family!

★ *"One spring day the kids were looking for something to do. We started pulling items out of the garage and from around the yard and we set up an obstacle course. A long two-by-four was used to tip-toe across, a big cardboard box to slither through and a basketball to dribble for the count of ten. We just kept adding new items and setting it all up until the course was complete. This simple activity kept us entertained and active for endless hours."* ★
