

# T-FIT

## Toastmaster's fully Integrated Timer

Instead of keeping 3 separate equipment (stopwatch, bell and traffic lights), the T-FIT integrates them all into 1 nifty box. The lights are big and bright, and impossible not to see them. The display and buttons and big enough to operate comfortably. And the machine is light weight and small enough to be taken home or from club to club.

Now, your club's timers can perform their roles and still enjoy every speech. They no longer need to keep watch of the time to control the traffic lights. Let T-FIT do the job for you. In fact, it is even possible for a toastmaster to do a speech and operate the timer at the same time.

With T-FIT, you bring new heights of operations and efficiency to your club's chapter meetings. The quality of T-FIT operations not only enhances the meeting logistics, it gives a sense of professionalism and quality to your club.

**Fully integrated stop-clock timer**

**Fully automated traffic lights sequencing and buzzer**

**15 different timing sequences for use**
