CLAIT Web Design Additional Exercise 2

In this exercise you will insert both a picture and a text file from either a floppy disk or the hard drive of the computer into your web design software. You will then change the style of text and alignment of the picture. The theme of this twopage web site is Allotments.

- 1. Open a new file in your web design software.
- 2. Type the title "Allotments" in size 24 type. Centre the text.
- 3. Insert the picture called "allotmentveg.jpg" below the title and centre it.
- 4. Make the picture smaller.
- 5. Under the picture, left aligned, insert the text file "allotments.txt".

(depending on version of FrontPage - click on Insert, File, All Files, "allotments.txt", Open, then click on "Normal Paragraphs", OK)

- 6. Make this text size 14 type.
- 7. On one row under the text type the following:
 - Snail Protection Email for Advice BBC Gardening
- 8. Make the text "Snail Protection" link to a new page called "snails.htm".

- 9. Make the text "Email for Advice" link to the following email address micklefieldonline@yahoo.co.uk
- 10. Make the text "BBC Gardening" link to the following webpage:
 http://www.bbc.co.uk/gardening/
- 11. Make the background of the page yellow.
- 12. Save the file as "allotments.htm".
- 13. Open the file you made earlier called "snails.htm"
- 14. Insert the picture called "snail.jpg" and centre it.
- 15. Under the picture insert the text file called "snailprotection.txt"
- 16. Make this text size 14 type
- 17. Under the text type the word "Home". Make this size 18 type.
- 18. Link the word "Home" to the file called "allotments.htm".
- 19. Print both pages along with their html codes.
- 20. Save the "snails.htm" file.
