CLAIT Web Design Additional Exercise 1

You are going to make two web pages linked together. Links will be made to an email address, an existing web page and between the pages you make. The theme of the pages is Florida.

1. Type the heading "Florida Holiday Options" in size 18 type.

2. Insert a clip art picture showing a beach, place it in the centre of the page. Resize the picture to around 3 cm in height.

3. Make the background of the page lime green.

4. Starting on a line underneath the picture, left aligned, type the following in Normal size type:

   > Hugging the turquoise waters of the Gulf of Mexico, Pensacola Beach, Florida awaits to meet all of your vacation expectations. No matter where you stay, a hotel, motel, bed & breakfast, campground or condominium, you are sure to find the perfect accommodation.

5. On a line under this text type the following three phrases:

   > Hotel   Bed and Breakfast   Condominium

6. Highlight the word "Hotel" and link it to the following email address:
   micklefieldonline@yahoo.co.uk

7. Highlight "Bed and Breakfast" and link it to a new page that you will leave empty. Call this new page "bed.htm".

8. Highlight the word "Condominium" and link it to the following web page : http://www.bbc.co.uk/holiday/destinations/florida/

9. Save this page as "florida.htm" and embed any pictures that are suggested by your software.

10.   Open the new page that you named "bed.htm".

11.   Insert the picture called "cottage.jpg" (from the floppy disk or hard drive of the computer). Place it at the top of the page in the centre.

12.   Under the picture type the following :

Florida Bed and Breakfast Inns is an association of premier small lodging accommodation throughout the state. Explore our site to discover the finest in traditional bed and breakfast inns, country inns, small oceanfront resorts and historic hotels.

13.   Under this text type "Home". Left align the word. Highlight this word and make a link to the file called "florida.htm".

14.   Make the background lime green.

15.   Save the file.

16.   Print both pages along with the codes.
