2.2.1 Protrusion	2.2 Extruded Features	. 48
	2.2.1 Protrusion	. 50
2.2.2 Cutout	2.2.2 Cutout	. 54
2.2.3 Thicken	2.2.3 Thicken	. 55
2.2.4 Surface	2.2.4 Surface	. 56

2.2.5 Feature Modification	57
2.3 Project: V-Block	58
2.3.1 Start Pro/Engineer Wildfire and Setup Properties	59
2.3.2 Create Extruded Base Feature	63
2.3.3 Cut Rectangular Slot	66
2.3.4 Cut V-Slot	68
2.3.5 Trapezoid Cutout	71
2.3.6 Get Model Properties	74
Chapter 3 Holes and Cosmetic Threads	76
3.1 Straight Holes	77
3.1.1 Simple Hole	77
3.1.2 Sketched Hole	81
3.2 Standard Holes	83
3.3 Cosmetic Threads	86
3.4 Project: Bracket	89
3.4.1 Build Base	90
3.4.2 Cut Base Round	93
3.4.3 Create Socket	95
3.4.4 Cut Top Round	97
3.4.5 Drill Counterbore Holes	99
3.4.6 Drill Countersink Holes 1	01
3.4.7 Create Simple Hole & Cosmetic Thread 1	03
Chapter 4 Rounds and Chmfers 1	105
4.1 Round Features	05
4.1.1 Constant rounds 1	06
4.1.2 Variable rounds 1	13
4.1.3 Curve driven rounds	17
4.1.4 Full rounds 1	17
4.1.5 Conic rounds 1	19
4.2 Chamfers 1	21
4.2.1 Edge Chamfers1	21
4.2.2 Corner Chamfer 1	27
4.3 Project: Movable Jaw 1	28
4.3.1 Create Jaw Body 1	29
4.3.2 Add Disk Boss, Drill a Hole, and Create Chamfer and Round 1	32
4.3.3 Make Socket and Add Rounds 1	35
4.3.4 Create Corner Rounds 1	37
4.3.5 Drill Standard Screw Holes 1	40
Chapter 5 Datums 1	42
5.1 Datum Point 1	42
5.1.1 General Datum Point 1	42
5.1.2 Sketched Datum Point 1	45
5.1.3 Offset Coordinate System Datum Point 1	46
5.2 Datum Coordinate System 1	47
5.2.1 Datum Coordinate System by Pla nes 1	47
5.2.2 Datum Coordinate System by Point and 2 Axes 1	48

5.2.3 Datum Coordinate System by Axes	149
5.2.4 Offset Datum Coordinate System	149
5.3 Datum Axis	150
5.4 Datum Curve	152
5.4.1 Sketched Datum Curve	152
5.4.2 Datum Curve throug Points	153
5.4.3 Datum Curve from File	157
5.4.4 Datum Curve Using Coss -Section	157
5.4.5 Datum Curve from Equation	159
5.5 Datum Plane	160
5.6 Project: Vertical Bearing Support	162
5.6.1 Create Support Base	163
5.6.2 Create Offset Datum Plane and Constnct Slot Base	165
5.6.3 Create an Angled Datum Plane, and Slot Body	166
5.6.4 Cut Slots	168
5.6.5 Add Hole Bosses	171
5.6.6 Constact a Tangent/Parallel Plane, Drill Holes and Add Fillets	173
Chapter 6 Copy, Mirror and Pattern Features	178
6.1 Copy Features	178
6.1.1 New Reference Copy	178
6.1.2 Same Reference Copy	180
6.1.3 Move Copy	180
6.2 Mirror Features	181
6.3 Pattern Features	182
6.3.1 Dimension Pattern	182
6.3.2 Dimension Pattern Controlld by Relations	186
6.3.3 Reference Pattern	187
6.3.4 Fill Pattern	188
6.3.5 Table Pattern	190
6.4 Project 1: Copy and Mirror – Shaft Guide	191
6.4.1 Create Triangle Base	193
6.4.2 Add Boss and Shaft Hole	194
6.4.3 Cut Keyway and Drill Hole	196
6.4.4 Copy and Mirror Hole	198
6.4.5 Add Round and Chamfer	200
6.5 Project 2: Rectangular Pattern – Bearing Block Cap	201
6.5.1 Build Cap Body	202
6.5.2 Drill Cap Hole and Pattern It using Rectangular Pattern Tool	204
6.5.3 Add Counterbore Cuts and Rounds	206
6.6 Project: Circular Pattern – Vise Base	208
6.6.1 Create the Base	210
6.6.2 Cut a Circular Pocket and Slot	212
6.6.3 Add Base Ear and Hole	215
6.6.4 Pattern Base Ear and Hole	217
Chapter 7 Revolved Features	220
7.1 Revolved Features	220

	222
7.2 Project: V-Pulley	. 223
7.2.1 Create Pulley Stock	. 224
7.2.2 Create Bore Using Revolved Cutout	. 226
7.2.3 Cut Trapezold Circular Slots	. 227
7.2.4 Cut and Copy V-Groove	. 228
7.2.5 Add Chamfers and Rounds	. 230
Chapter 8 Sweep Features	. 232
8.1 Sweep Features	. 232
8.2 Project: Support Bracket	. 236
8.2.1 Create Foot Mount	. 237
8.2.2 Attach a Link to the Foot Mount	. 238
8.2.3 Add a Flange at the End of the Link	. 240
8.2.4 Add Circular Cutout and Cut Circular Slots	. 241
8.2.5 Drill Counterbore Holes	. 245
Chapter 9 Blended and Swept Blended Features	. 248
9.1 Parallel Blends	. 248
9.2 Rotational Blends	. 254
9.3 General Blends	. 257
9.4 Swept Blends	. 258
9.4.1 Swept Blend Normal to Origin Trajectory	. 259
9.4.2 Swept Blend Normal to Trajectory	. 263
9.4.3 Swept Blend – Pivot Direction	. 264
9.5 Project: Parallel Blend – Chisel	. 265
9.5.1 Create Chisel Blade	. 266
9.5.2 Add Blade Connection	. 267
9.5.3 Attach Chisel Handle	. 268
9.5.4 Drill Handle Hole	. 269
9.6 Project: Swept Blend: Handle	. 270
9.6.1 Create Handle Head	. 271
9.6.2 Attach Handle Link	. 273
9.6.3 Build Handle	. 276
9.6.4 Cut Pocket	. 276
9.6.5 Add Chamfer and Rounds	. 278
Chapter 10 Draft and Shell Features	. 280
10.1 Draft	. 280
10.1.1 No Split Draft	. 280
10.1.2 Split Draft	. 283
10.2 Shell	. 287
10.3 Project: Power Socket Cover	. 289
10.3.1 Create Cover Body	. 290
10.3.2 Add Thin Walls	. 296
10.3.3 Cut Slots and Holes	.300
10.3.4 Create Plug Bosses and Holes	. 304
Chapter 11 Ribs and Relations	. 311
11.1 Ribs	. 311
11.2 Relations	. 313
	-

	210
11.3 Project: Rotary Yoke	319
11.3.1 Create Yoke Base	319
11.3.2 Add Cylinder Boss, Cut Shaft Hole and Keyway	323
11.3.3 Add Ribs	325
11.3.4 Add Equation and Rounds	327
Chapter 12 Feature Modifications	329
12.1 Feature Edit	
12.2 Feature Reorder	
12.3 Feature Suppress/Resume	332
12.4 Add Features in Insert Mode	333
12.5 Project: Oil Pan	333
12.5.1 Create rim and modify it by editing profile	334
12.5.1 Create Oil Pa Body	336
12.5.2 Oreate off 1 a body	
12.5.4 Shelloil pan and reorder the shellbefore holes	330
12.5.5 Insert a fillet on the bottom of the pan body by Insert Mode	3/0
Chapter 12 User Defined Feature and Derived Part	247
12 1 User Defined Feature (UDE)	242
13.1 User Defined Feature (UDF)	
12.1.2 Place a UDE in a Model	
12.2 Device a UDF in a Model	
13.2 Derived Part	
13.3 Project: Double A	346
13.3.1 Create letter A and add relations	
13.3.2 Create User Defined Feature	
13.3.3 Insert UDF into the part	349
13.4 Project: Rocker Arms	351
13.4.1 Create Rocker Arm	351
13.4.2 Create Opposite Rocker Arm	353
Chapter 14 Family Table	356
14.1 Create a Family Table	356
14.2 Project: Flat Slotted Screw	362
14.2.1 Create First Flat Slottd Screw	363
14.2.2 Change Dimensions Name and Add Relations	364
14.2.3 Create Family Table of Flat Slottd Screw	365
Chapter 15 Helical Sweep	369
15.1 Helical Sweep Features	369
15.1.1 Constant Pitch Helical Sweeps	370
15.1.2 Variable Pitch Helical Sweeps	372
15.2 Project: Fixed Jaw	373
15.2.1 Create the jaw body by extruded features	375
15.2.2 Create the cutouts using extruded features	377
15.2.3 Add thread hole using helical sweep feature	382
15.2.4 Create jaw and screw holes.	384
Chapter 16 Assembly	390
16.1 Assembly Constraints	390
16.1.1 Mate	390

16.1.2 Align	. 391
16.1.3 Insert	. 391
16.1.4 Tangent	. 391
16.1.5 Coordinate System	. 392
16.1.6 Point on Line, Point on Surface, Edge on Surface	. 392
16.1.7 Automatic	. 393
16.2 Place a Component into Assembly	. 393
16.3 Pattern Component and Create New Component	. 398
16.4 Project: Mechanic Vise	. 399
16.4.1 Assemble Base, Fixed Jaw, Bolt M8	. 401
16.4.2 Assemble Spherical Head Bolt, Washer, Lock Nut and Handle	. 405
16.4.3 Assemble Guide Bar and Movable Jaw	. 412
16.4.4 Assemble Washer 15 and Screw	. 414
16.4.5 Assembly Cotter Pin, Handle and Handle End	. 417
16.4.6 Assemble Jaw Plates and Screw M3	. 420
Chapter 17 Exploded Assembly View	. 423
17.1 Exploded Assembly View	. 423
17.2 Project: Mechanic Vise Exploded View	. 426
17.2.1 Move Bolt M8 and Spherical Hed Bolt, and Vise Base	. 426
17.2.2 Move Lock Nut, Lock Handle, Lock Handle Head and Washer	. 430
17.2.3 Move Handle, Screw, Washers and Cotter Pin	. 431
17.2.4 Move Movable Jaw and Jaw Plates	. 433
Chapter 18 Drawing Format and Standard Views	. 435
18.1 Drawing Format	. 435
18.2 Standard Drawing Views	. 439
18.3 Project: Bracket Drawings	. 445
18.3.1 Create a Section for Drawing Borders and Title Block	. 445
18.3.2 Insert the Border into Drawing Format	. 446
18.3.3 Add Texts in Title Block	. 446
18.3.4 Create Drawing Views	. 448
Chapter 19 Section, Auxiliary, and Other Views	. 451
19.1 Sector Views	. 451
19.1.1 Planar Section View	. 453
19.1.2 Offset Secton View	. 455
19.1.3 Revolved Sector View	. 45/
19.1.4 Align Sector View	. 458
19.1.5 Unitid Section View.	. 459
19.1.0 Local Section View	. 400
19.1.7 Full & Local Section View	. 401
19.2 Auxiliary Views	. 402
19.5 Detailed Views	. 405
19.7 I allial views	. 4 04 265
19.5 Divide Views	. то <i>э</i> 466
19.6.1 Create a general view and a top view	<u>467</u>
19.6.1 Create a general view and a top view	
17.0.2 Create a cross-section view	. 100

19.6.3 Add a local cross-section view	470
19.6.4 Create an auxiliary view	474
19.6.5 Add a detail view	476
Chapter 20 Drawing Detailing	478
20.1 Dimensions & Their Tolerances	478
20.1.1 Show/Erase Driving Dimensions	478
20.1.2 Move Dimensions and Modify Dimensions' Properties	479
20.1.3 Set Dimensional Tolerance	482
20.1.4 Add Driven Dimensions	483
20.2 Notes	484
20.3 Surface Finishes	486
20.4 Weld Symbols	489
20.5 Geometric Tolerances	490
20.6 Project: Bracket Drawing	492
20.6.1 Show/Erase Driving Dimensions, Add Driven Dimensions	492
20.6.2 Show Hole Axis and Center Lines	493
20.6.3 Assign Dimension Tolerance	495
20.6.4 Add Geometric Tolerance and Surface Finish	497
20.6.5 Place Parametric Notes	499
Chapter 21 Assembly Drawing	503
21.1 Bill of Materials	503
21.1.1 Define a Table for BOM	503
21.1.2 Define Repeating Row	506
21.1.3 Add Notes in Title Row and Define Cells in Repeat Region	507
21.2 Balloon Callout	508
21.3 Change Component Coss hatch	509
21.4 Project: Mechanic Vise Assembly Drawing	510
21.4.1 Create User-Defined Parameters in Parts	510
21.4.2 Create Assembly Drawing Format	514
21.4.3 Create Drawing Views and Change Hatches of Components	517
21.4.4 Call out Balloons	519
21.4.5 Add a New Sheet for Exploded View	520
