

Mastering SolidWorks 2005

Hui Zhang, Ph.D., P.Eng.
Senior Mechanical Engineer, Quad Engineering

Chin-Sheng Chen, Ph.D
Professor, Florida International University

Table of Contents

Mastering SolidWorks

Chapter 1 Introduction to SolidWorks.....	1
1.1 Solid (3D) modeling	1
1.2 Feature-based	2
1.3 Dimension-driven (Parametric)	3
1.4 Bi-directional data linkage	3
1.5 SolidWorks User Interface.....	3
1.6 Mouse Button Functions	5
1.7 Getting Help.....	6
1.8 Solid Modeling Fundamentals Using SolidWorks	7
1.9 Setup SolidWorks Options and Customize SolidWorks	10
1.10 How to Use This Book.....	13
 Chapter 2 Sketch and Sketch Tools	 15
2.1 Sketch.....	15
2.2 Sketch a Shape and Sketch Tools	19
2.2.1 Line	19
2.2.2 Centerpoint Arc.....	23
2.2.3 Tangent Arc	24
2.2.4 3 Pt Arc	26
2.2.5 Circle.....	27
2.2.6 Spline	29
2.2.7 Polygon	32
2.2.8 Rectangle.....	34
2.2.9 Point	34
2.2.10 Centerline.....	35
2.2.11 Convert Entities	35
2.2.12 Sketch Mirror	36
2.2.13 Sketch Fillet	38
2.2.14 Sketch Chamfer.....	39
2.2.15 Offset Entities	41
2.2.16 Trim.....	43
2.2.17 Construction Geometry.....	45
2.2.18 Linear Sketch Step and Repeat	46
2.2.19 Circular Sketch Step and Repeat.....	50
2.3 Relations	53
2.3.1 Horizontal or Vertical	54
2.3.2 Collinear.....	56
2.3.3 Coradial.....	57
2.3.4 Perpendicular	57
2.3.5 Parallel	57
2.3.6 Tangent	58

Table of Contents

2.3.7 Concentric	58
2.3.8 Midpoint.....	59
2.3.9 Intersection.....	59
2.3.10 Coincident.....	60
2.3.11 Equal	61
2.3.12 Symmetric	61
2.3.13 Fix	62
2.3.14 Pierce.....	63
2.3.15 Merge	63
2. 4 Dimensions	63
2.4.1 Length Dimension of a Line	65
2.4.2 Angle Dimension between Two Lines.....	66
2.4.3 Distance between two lines.....	67
2.4.4 Perpendicular distance from a point to a line.....	67
2.4.5 Distance between two points	68
2.4.6 Radius of an arc	69
2.4.7 True length of an arc	69
2.4.8 Diameter of a circle.....	70
2.4.9 Distance when both entities are an arc or a circle.....	70
2.4.10 Distance when one entity is an arc or a circle, and the other is a line.....	73
2.4.11 Modify and Delete Dimensions	73
2.5 Sketch Project	74
2.5.1 Start SolidWorks and Set up the Document Properties	75
2.5.2 Sketch Geometrical Entities.....	76
2.5.3 Apply Constraints	81
2.5.4 Dimension the Sketch	85
Chapter 3 Extruded Boss and Cut.....	89
3.1 Extruded Boss	89
3.2 Extruded Cut	101
3.3 Profile Options	102
3.4 Extruded Feature Project: V-Block.....	106
3.4.1 Modeling Procedure.....	107
3.4.2 Start SolidWorks and Set up Properties.....	108
3.4.3 Create Extruded Base Feature.....	112
3.4.4 Cut Rectangular Slot.....	114
3.4.5 Cut V-Slot	116
3.4.6 Cut a Trapezoid Slot	119
3.4.7 Change Feature Names and Check Model Mass Properties	123

Table of Contents

Chapter 4 Holes and Cosmetic Threads	127
4.1 Simple Hole	127
4.1.1 Insert a Simple Hole.....	128
4.1.2 Position the hole.....	129
4.1.3 Change the diameter, depth, or type of hole	129
4.2 Hole Wizard	130
4.2.1 Counterbore.....	131
4.2.2 Countersink	134
4.2.3 Hole.....	136
4.2.4 Tap	138
4.2.5 PipeTap	140
4.2.6 Legacy.....	142
4.3 Cosmetic Thread	143
4.4 Hole Project: Bracket.....	144
4.4.1 Create a Base.....	146
4.4.2 Add a Boss on the Base	148
4.4.3 Cut the Socket on the Boss	150
4.4.4 Create Fillets on the Boss	154
4.4.5 Drill Counterbored Holes on the Base	157
4.4.6 Create Countersunk Holes on the Boss.....	159
4.4.7 Add a Simple Hole and Cosmetic Thread on the Base.....	162
 Chapter 5 Fillets and Chamfers	 167
5.1 Fillets.....	167
5.1.1 Constant Radius, Multiple Radius, and Round Corner Fillets.....	168
5.1.2 Setback Fillet	172
5.1.3 Variable Radius Fillet	175
5.1.4 Face Blend Fillets	178
5.1.5 Full Round Fillet	180
5.2 Chamfers	181
5.2.1 Angle-distance Chamfer	182
5.2.2 Distance-distance Chamfer	183
5.2.3 Vertex Chamfer.....	183
5.3 Fillet and Chamfer Project: Movable Jaw	184
5.3.1 Create Jaw Body	186
5.3.2 Create a Disk Boss, Cut Hole and Add a Fillet and Chamfer.....	189
5.3.3 Cut Rectangular Socket and Fillet Corners.....	193
5.3.4 Fillet Corners	195
5.3.5 Drill Screw Holes.....	198
 Chapter 6 Reference Geometries	 201
6.1 Plane.....	201
6.1.1 Through Lines/Points	202
6.1.2 Parallel Plane at Point.....	203
6.1.3 Plane At Angle.....	204

Table of Contents

6.1.4 Offset Distance.....	206
6.1.5 Normal to Curve	206
6.1.6 On Surface	207
6.1.7 Moving, Resizing, and Copying and Modifying Planes	210
6.2 Axis.....	211
6.3 Coordinate System	213
6.4 Project: Vertical Bearing Support.....	215
6.4.1 Create Support Base.....	217
6.4.2 Create an Offset Plane and a Support Boss	219
6.4.3 Create an Angle Plane and a Slot Body	221
6.4.4 Cut Slots.....	223
6.4.5 Create Bosses on the Base	227
6.4.6 Create Holes and Fillets	231
 Chapter 7 Copy, Mirror and Pattern Features.....	241
7.1 Copy.....	241
7.1.1 Copy a feature within the model by Dragging.....	241
7.1.2 Copy features by Copy and Paste	243
7.1.3 Re-attach Dangled dimensions and Add New Dimensions	243
7.1.4 Copy Features between Parts:	244
7.2 Mirror.....	244
7.3 Pattern	246
7.3.1 Linear Pattern.....	247
7.3.2 Circular Pattern	251
7.3.3 Table Driven Patterns	253
7.3.4 Sketch Driven Pattern	255
7.3.5 Curve Driven Pattern	256
7.4 Project 1: Copy and Mirror -- Shaft Guide	259
7.4.1 Create Triangle Base.....	261
7.4.2 Add Boss and Shaft Hole	263
7.4.3 Drill Hole and Cut Keyway	264
7.4.4 Copy and Mirror Hole.....	266
7.4.5 Add Fillet and Chamfer	267
7.5 Project 2: Linear Pattern – Bearing Block Cover	268
7.5.1 Create Cover	269
7.5.2 Drill Bolt Hole and Pattern It	271
7.5.3 Cut Counterbore.....	272
7.6 Project 3: Circular Pattern – Vise Base.....	274
7.6.1 Create a Vise Base	276
7.6.2 Create a Circular Slot.....	276
7.6.3 Add an Ear and Drill Holes.....	279
7.6.4 Create a Circular Pattern for the Ear.....	281
 Chapter 8 Revolved Features.....	283

Table of Contents

8.1 Revolved Feature	283
8.2 Project: V-Pulley.....	287
8.2.1 Create V-Pulley Stock.....	288
8.2.2 Cut Bearing Bores.....	289
8.2.3 Cut Trapezoid Circular Slot and Mirror It to the Other Side.....	290
8.2.4 Cut V-belt Groove and Pattern It	293
8.2.5 Add Chamfers and Fillets	295
Chapter 9 Sweep Features.....	297
9.1 Profile and Path for Sweep Features	297
9.2 Simple Sweep Feature.....	298
9.3 Sweep with Guide Curves.....	302
9.4 Project: Cranking Lever.....	304
9.4.1 Create a Cranking Lever Head.....	305
9.4.2 Create a Handle Body using Sweep.....	309
9.4.3 Create Lever Handle and Head Hole Using Revolved Features.....	313
9.4.4 Create Handle Rib and Fillets.....	314
Chapter 10 Loft Features	317
10.1 Simple Loft	317
10.2 Loft with a non-planar profile.....	321
10.3 Loft with guide curves	322
10.4 Loft with Centerline.....	324
10.5 Loft Start and End Constraints Options	325
10.6 Loft Project: Mechanic-vise Handle	328
10.6.1 Create a Handle Head	329
10.6.2 Create Handle Link.....	330
10.6.3 Create Handle.....	333
10.6.4 Cut a Pocket on the Handle Link	334
10.6.5 Add Chamfers and Fillets	335
Chapter 11 Face Draft and Shell.....	337
11.1 Neutral Plane Drafts.....	337
11.2 Parting Line Drafts.....	340
11.3 Step Drafts	342
11.4 Shell Features.....	344
11.5 Project: Power Socket Cover	346
11.5.1 Create Cover Body Using Extruded, Draft and Shell Features	347
11.5.2 Create Screw Poles and Thin Walls on the Cover Body	350
11.5.3 Create Power Switch Slot, Holes, and Edge Cut	356
11.5.4 Create Plug Holes	359
Chapter 12 Curves.....	365
12.1 Composite Curve	365
12.2 Project Curve	366

Table of Contents

12.3 Helix and Sprial	368
12.4 Split Line.....	371
12.5 Curve Through Reference Points.....	376
12.6 Curve Through Free Points.....	376
12.7 Project: Fixed Jaw	378
12.7.1 Create the Jaw Body	380
12.7.2 Create Cuts on The Jaw Body and Jaw Tail	383
12.7.3 Create a Trapezoid Thread Using Helix Curve.....	388
12.7.4 Create Jaw, Platform, and Thread Holes	391
Chapter 13 Ribs and Equations	399
13.1 Ribs	399
13.2 Equations.....	403
13.3 Project: Rotary Yoke.....	407
13.3.1 Create Yoke Base.....	409
13.3.2 Create Cylinder Boss and Cut Shaft Hole.....	411
13.3.3 Create Ribs.....	412
13.3.4 Add an Equation and Create Fillets	414
Chapter 14 Derived Part and Design Table	417
14.1 Derived Parts.....	417
14.1.1 Base Part	417
14.1.2 Mirror Part	420
14.1.3 Derive Component Part.....	421
14.1.4 Edit Derived Parts	422
14.2 Design Table	423
14.2.1 Create a Design Table as a Separate Excel File.....	423
14.2.2 Inserting a New Design Table.....	427
14.2.3 Inserting a New Design Table by Auto-create Option.....	429
14.2.4 Edit and Delete a Design Table	429
14.3 Project: Flat Slotted Screw.....	430
14.3.1 Create Flat Slotted Screw.....	430
14.3.2 Change Dimensions' Names and Add Equations	432
14.3.3 Create a Design Table for the Screw	433
14.3.4 Show Configurations	434
Chapter 15 Feature Modifications	435
15.1 Feature Editing.....	435
15.1.1 Edit Feature.....	435
15.1.2 Edit Sketch	436
15.1.3 Edit Sketch Plane	436
15.1.4 Delete Features.....	436
15.2 Feature Reorder.....	437
15.3 Suppress/Unsuppress	438

Table of Contents

15.4 Rollback	439
15.5 Project: Oil Pan	440
15.5.1 Create the Rib Body and Modify it by Editing Sketch	440
15.5.2 Create the Oil Pan Body By Extrusion and Draft	442
15.5.3 Create Holes	443
15.5.4 Shell the Oil Pan, and Reorder the Shell Before Holes	445
15.5.5 Create a Fillet on the Bottom of Oil Pan by Rolling back	447
 Chapter 16 Assembly and Exploded View.....	449
16.1 Adding Components to an Assembly	449
16.1.1 Add components by using the menu or toolbar	449
16.1.2 Drag and Drop Components from an Open Part Window	450
16.1.3 Drag and Drop Components using Windows Explore.....	451
16.1.4 Copy and paste a component to add another instance	451
16.2 Deleting a Component from an Assembly	452
16.3 Position Components in an Assembly	452
16.3.1 Inference to the Assembly Origin	453
16.3.2 Fixing the Position of a Component	453
16.3.3 Moving a Component	454
16.3.4 Rotating a Component	455
16.4 Assembly Mating	456
16.4.1 Create a Mating Relationship.....	456
16.4.2 Modify a Mating Relationship	459
16.4.3 Delete and Suppress a Mating Relationship	460
16.5 Pattern and Mirror Components.....	461
16.6 Suppress and Hide Components	466
16.7 Create and Edit Parts in the Assembly Context.....	468
16.8 Explode an Assembly View.....	469
16.9 Project: Vise Assembly.....	472
16.9.1 Insert Base, Bolt M8, Spherical Head Bolt, and Washer 8	474
16.9.2 Install Fixed Jaw, Washer 8, Lock Nut, Lock Handle and Handle Head	478
16.9.3 Assemble Guide Bar, Movable Jaw and Washers	484
16.9.4 Add Screw, Cotter Pin, Handle, and Handle Head	489
16.9.5 Install Jaw Plates and Screw M3	493
16.9.6 Create an Exploded View	495
 Chapter 17 Drawing Template and Views	497
17.1 Drawing Options	497
17.2 Drawing Template	504
17.3 Drawing Views	508
17.3.1 Standard 3 View.....	509
17.3.2 Projection View	510

Table of Contents

17.3.3 Auxiliary View.....	512
17.3.4 Model View	513
17.3.5 Relative View.....	514
17.3.6 Detail View	515
17.3.7 Broken View	517
17.3.8 Section View and Aligned Section View.....	519
17.3.9 Broken-out Section	522
17.3.10 Crop View	523
17.4 Project: Vertical Bearing Support Drawing.....	524
17.4.1 Create a Customized Sheet Format.....	524
17.4.2 Create a Relative View	526
17.4.3 Select Type of Projection and Create Projected Views	527
17.4.4 Create a Section View and Modify a Section Line.....	527
17.4.5 Create an Auxiliary View	528
17.4.6 Create a Detail View.....	529
Chapter 18 Drawing Detailing	531
18.1 Dimensions	531
18.1.1 Import Model Dimensions	531
18.1.2 Add Driven Dimensions	534
18.1.3 Modify Dimensions	536
18.2 Annotations.....	539
18.2.1 Import Model Annotations.....	539
18.2.2 Create Annotations in the Drawing.....	539
18.3 Project: Bracket Drawing.....	553
18.3.1 Create Drawing Views.....	553
18.3.2 Add Model Dimensions	554
18.3.3 Add Driven Dimensions	555
18.3.4 Insert Hole Callout and Thread Callout	556
18.3.5 Add Dimension Tolerance, and Surface Finish Symbol.....	556
18.3.6 Add Notes	557
Chapter 19 Assembly Drawings.....	561
19.1 Bill of Materials	561
19.2 Balloon Callout	567
19.3 Change Component Crosshatch.....	572
19.4 Project: Vise Assembly Drawing.....	573
19.4.1 Create Assembly Drawing Views.....	573
19.4.2 Change Crosshatch of Components in the Section View	575
19.4.3 Insert Bill of Materials	577
19.4.4 Add Balloons	577
19.4.5 Insert a New Sheet and Exploded View	578
Chapter 20 Sheet Metal	583
20.1 Base Flange/Tab.....	584

Table of Contents

20.2 Sketched Bend	586
20.3 Edge Flange	588
20.4 Miter Flange.....	594
20.5 Closed Corner	598
20.6 Hem.....	600
20.7 Break Corner	603
20.8 Jog.....	604
20.9 Unfold/Fold.....	607
20.10 Flattening Sheet Metal Bends	609
20.11 Bend Allowance.....	613
20.11.1 K Factor	613
20.11.2 Bend Table	614
20.11.3 Set up Bend Allowance Method	616
20.12 Convert a Solid Part to a Sheet Metal Part	617
20.12.1 Rip.....	619
20.12.2 Insert Bends/No Bends	620
20.13 Sheet Metal Project: Hinge	621
20.13.1 Create Base Flange	622
20.13.2 Add a Sketch Bend.....	624
20.13.3 Add Two Edge Flanges.....	624
20.13.4 Add a Tab to the Base Flange	625
20.13.5 Create a 45 degree Jog	626
20.13.6 Add Two Miter Flanges on the Edge Flanges	628
20.13.7 Create a Hem on the Tip of the Tab.....	630
20.13.8 Break the Corners and Add Screw Holes	631
20.13.9 Flatten the Sheet Metal Part.....	634
 Chapter 21 Surfaces.....	637
21.1 Extruded, Revolved, Swept, Lofted, and Planar Surfaces	637
21.2 Offset, Mid, Radiate, Extended, and Imported Surfaces	639
21.2.1 Offset Surface Tool.....	639
21.2.2 Mid Surface Tool	639
21.2.3 Radiate Surface Tool.....	641
21.2.4 Extended Surface Tool.....	642
21.2.5 Import Tool	644
21.3 Delete Face, Replace Face, and Move/Copy Surface	644
21.3.1 Delete Face Tool	644
21.3.2 Replace Face Tool.....	646
21.3.3 Move/Copy Surface Tool.....	646
21.4 Filled, Trimmed, Untrimmed, and Knit Surfaces	651
21.4.1 Filled Surface Tool	651
21.4.2 Trimmed Surface Tool.....	655
21.4.3 Untrim Surface.....	657
21.4.4 Knit Surface Tool.....	659
21.5 Thicken Features and Cut with Surface	660

Table of Contents

21. 6 Project: Fan Blade.....	664
21.6.1 Create Inner and Outer Boundary Surfaces	665
21.6.2 Form Inner and Outer Surfaces.....	666
21.6.3 Build Side Boundary Surfaces	671
21.6.4 Build Top and Bottom Boundary Surfaces	672
21.6.5 Trim, Knit and Thicken the Surfaces to Form the Solid Blade. ...	673
21.6.6 Add the Fan Hub.....	678
21.6.7 Pattern the Blade, and Cut the Shaft Hole and Keyway.	679
