

Table of Contents

Chapter 1 Introduction to Solid Edge	1
1.1 Solid Modeling Fundamentals	2
1.2 Solid Edge User Interface	3
1.3 Customize Solid Edge	. 13
1.4 Mouse Usage	. 15
1.5 How To Use This book	. 16
Chapter 2 Sketch and Extruded Features	17
2.1 Sketch and Profile	. 17
2.1.1 Sketch Elements	. 17
2.1.2 Constraints	. 35
2.1.3 Dimensions	. 38
2.2 Extruded Features	. 43
2.2.1 Protrusion	. 43
2.2.2 Cutout	. 46
2.2.3 Feature Modification	. 46
2.3 Extruded Feature Project: Dovetail Slide	. 49
2.3.1 Start Solid Edge Part, and Setup Properties	. 50
2.3.2 Create Base Feature	. 52
2.3.3 Create Dovetail Cutout	. 54
2.3.4 Create Side Slot Using Cutout	. 55
2.3.5 Cut Front and Back Slots	. 56
2.3.6 Get Part Physical Properties	. 57
Chapter 3 Holes and Threads	59
Chapter 3 Holes and Threads	. 59 . 60
Chapter 3 Holes and Threads	. 60 . 63
Chapter 3 Holes and Threads 3.1 Simple Hole 3.2 Threaded Hole 3.3 Tapered Hole	59 . 60 . 63 . 64
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75 . 76
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75 . 76 . 78
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75 . 76 . 78 . 80
Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75 . 76 . 78 . 80 . 81

Chapter 3 Holes and Threads	59 . 60 . 63 . 64 . 66 . 67 . 68 . 71 . 72 . 73 . 75 . 76 . 78 . 80 . 81 83 . 83 . 83 . 83 . 87 . 90 . 93

4.2.2 Angle and Setback Chamfer	
4.2.3 2 Setbacks Chamfer	
4.3 Project: Movable Jaw	
4.3.1 Create Jaw Body	
4.3.2 Create a Disk Boss, Cut a Hole and Add a Round and a Chamfer	
4.3.3 Cut a Rectangular Socket and Its Round Corners	102
4.3.4 Create Corner Rounds	103
4.3.5 Drill Screw Holes	105
Chapter 5 Reference Plane	107
5.1 Coincident Plane	108
5.2 Parallel Plane	109
5.3 Angled Plane	109
5.4 Perpendicular Plane	111
5.5 Coincident Plane by Axis	113
5.6 Plane Normal to Curve	114
5.7 Plane by 3 Points	115
5.8 Project: Vertical Bearing Support	116
5.8.1 Create a base	118
5.8.2 Create a Parallel Plane, and a slot boss for creating the slot body	118
5.8.3 Create an angled plane and a slot body	119
5.8.4 Cut the slots on the slot body and the base	121
5.8.5 Add hole bosses for drilling holes	122
5.8.6 Drill holes and add rounds	124
Chapter 6 Copy, Mirror and Pattern Features	131
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features	 131
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features	 131 131 133
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features	 131 131 133 134
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features 6.3.1 Rectangular Pattern	 131 131 133 134 134
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features 6.3.1 Rectangular Pattern 6.3.2 Circular Pattern	 131 131 133 134 134 137
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features 6.3.1 Rectangular Pattern 6.3.2 Circular Pattern 6.4 Project 1: Copy and Mirror – Shaft Guide	 131 131 133 134 134 137 139
 Chapter 6 Copy, Mirror and Pattern Features	 131 131 133 134 134 137 139 140
 Chapter 6 Copy, Mirror and Pattern Features	 131 131 133 134 134 137 139 140 141
 Chapter 6 Copy, Mirror and Pattern Features	 131 131 133 134 134 137 139 140 141 142
 Chapter 6 Copy, Mirror and Pattern Features	 131 131 133 134 134 137 139 140 141 142 144
 Chapter 6 Copy, Mirror and Pattern Features	 131 131 133 134 134 134 137 139 140 141 142 144 145
 Chapter 6 Copy, Mirror and Pattern Features	131 133 134 134 134 134 134 137 139 140 141 142 141 142 144 145 146
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 135 140 141 142 144 145 146 147
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 140 141 142 144 145 146 147 148
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 135 140 141 142 144 145 146 147 148 150
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 144 145 146 147 148 150
 Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features 6.3.1 Rectangular Pattern 6.3.2 Circular Pattern 6.3.2 Circular Pattern 6.4 Project 1: Copy and Mirror – Shaft Guide 6.4.1 Create Triangle Base 6.4.2 Add Boss and Shaft Hole 6.4.3 Cut Keyway and Drill Hole 6.4.4 Copy and Mirror Hole 6.4.5 Add Round and Chamfer 6.5 Project 2: Rectangular Pattern – Bearing Block Cover 6.5.1 Create a cover 6.5.2 Drill bolt hole and pattern it using rectangular pattern 6.5.3 Cut counterbore, and mirror it 6.6 Project 3: Circular Pattern – Vise Base 6.6.1 Create the base 	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 144 145 144 145 146 147 148 150 150 151
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 144 145 146 147 148 150 150 151
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 141 142 144 145 146 147 148 150 151 152 154
Chapter 6 Copy, Mirror and Pattern Features 6.1 Copy Features 6.2 Mirror Features 6.3 Pattern Features 6.3.1 Rectangular Pattern 6.3.2 Circular Pattern 6.4 Project 1: Copy and Mirror – Shaft Guide 6.4.1 Create Triangle Base 6.4.2 Add Boss and Shaft Hole 6.4.3 Cut Keyway and Drill Hole 6.4.4 Copy and Mirror Hole 6.4.5 Add Round and Chamfer 6.5 Project 2: Rectangular Pattern – Bearing Block Cover 6.5.1 Create a cover 6.5.2 Drill bolt hole and pattern it using rectangular pattern 6.5.3 Cut counterbore, and mirror it 6.6 Project 3: Circular Pattern – Vise Base 6.6.1 Create the base 6.6.2 Cut a circular slot on the base 6.6.3 Create an ear and holes on the base 6.6.4 Generate a circular pattern of the ear and hole	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 144 145 144 145 146 147 148 150 150 151 152 154
 Chapter 6 Copy, Mirror and Pattern Features	131 131 133 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 134 137 139 140 141 142 141 142 144 145 146 147 148 150 150 151 152 154 155 157

7.2 Revolved Protrusion	158
7.3 Revolved Cutout	162
7.4 Project – V-Pulley	163
7.4.1 Create Pulley Stock using Revolved Protrusion	164
7.4.2 Create Bearing Bore using Revolved Cutout	164
7.4.3 Cut Trapezoid Circular Slots using Revolved Cutout and Mirror	165
7.4.4 Create V-Belt Groove by Revolved Cutout and Copy it	167
7.4.5 Add Chamfer and Rounds	169
Chapter 8 Sweep Features	171
8.1 Single-Cross Section, Single-Path Sweep Features	172
8.1.1 Create a sweep feature by means of creating profile and path first	172
8.1.2 Create a sweep feature within Sweep Command	174
8.1.3 Edit Sweep Feature	175
8.2 Multiple Path and Cross Section (MPC) Sweep Features	175
8.2.1 Create a MPC sweep by means of creating profile and path first	175
8.2.2 Create a MPC sweep within Sweep Command	178
8.3 Project – Cranking Lever	179
8.3.1 Create a crank head using revolved feature	180
8.3.2 Add a handle body using sweep	182
8.3.3 Create a handle and hole by revolved feature	185
8.3.4 Create a rib, and rounds on the crank lever	186
Chapter 9 Loft Features	189
9.1 Cross-sections, Vertex Mapping, and Guide Curves	189
9.2 Construct Loft Features by Drawing Cross-sections and Guide Curves	191
9.3 Construct Loft Feature by Selecting Cross-sections and Guide Curves	197
9.4 Loft Feature Modification	198
9.5 Project: Machine-Vise Handle	199
9.5.1 Create a Handle Head	200
9.5.2 Add a Handle Link	201
9.5.4 Attach a Handle	203
9.5.4 Cut a Pocket	204
9.5.5 Create Chamfer and Rounds	204
Chapter 10 Draft, Thin Wall, Thin Region, and Thicken	207
10.1 Draft Features	207
10.1.1 Draft from Plane	208
10.1.2 Draft From Edge	209
10.1.3 Draft From Parting Surface	211
10.1.4 Draft from Parting Line	212
10.2 Thin Wall, Thin Region, and Thicken Features	213
10.2.1 Thin Wall	214
10.2.2 Thin Region	215
10.2 Project: Power Socket Cover	217
10.3 Flujcel Fuwer Socket Cover Rody and Serviv Polos	218
10.3.1 Create Cover Body and Screw Fores	219 224
10.3.2 Create Slot Hole and Cuts on The Cover Rody	+22 227
	441

10.3.4 Create Plug Bosses and Holes	
Chapter 11 Curves, Surfaces, and Part Construction	
11.1 Curves	
11.1.1 Intersection Curve	
11.1.2 Project Curve	
11.1.3 Cross Curve	
11 1 4 Keypoint Curve	239
11.1.5 Curve By Table	
11 1 6 Contour Curve	242
11 1 7 Derived Curve	243
11 1 8 Split Curve	244
11 1 9 Intersection Point	245
11.2 Surfaces and Surface Transformation	246
11.2.1 Extruded Revolved Swept and Lofted Surfaces	247
11.2.2 Bounded Surface	248
11.2.2 Dounded Surface	249
11.2.4 Copy Surface	250
11.2.5 BlueSurf	251
11.2.6 BlueDot	255
11.2.0 Dilebot	257
11.2.7 Delete Fuelos	258
11.2.9 Extend Surface	259
11.2.10 Stitched Surface and Shown Non-Stitched Edges	260
11.2.11 Benlace Face	262
11.3 Part Construction	263
11 3 1 Part Copy	263
11 3 2 Divide Part	265
11 3 3 Boolean Feature	267
11 4 Project: Fan Blade	269
11 4 1 Create Boundary Surfaces by Revolved Surfaces	270
11.4.2 Build Fan Blade by Curves and Lofted constructions	272
11 4 3 Add Fan Hub, and Cut Shaft Hole	281
11.4.4 Pattern Blade	
Chanter 12 Helical and Normal Features	284
12 1 Helical Features	284
12.1 Normal Features and Text Profile	284
12.2 Tormar Features, and Text Profile	288
12.2.1 Text Home	200
12.2.2 Roman Feature	
12.3 1 Create Jaw Body	292
12.3.1 Create Cutouts on Jaw Rody	
12.3.2 Create Transzoid Thread Using Helical Cutout	275
12.3.4 Create Jaw Platform and Screw Holes	301
Chanter 13 Rib Web Network and Lin	310
13.1 Rib	310
13.2 Web Network	313

13.3 Lip	316
13.4 Project: Rotary Yoke	317
13.4.1 Create Yoke Base	318
13.4.2 Create Cylinder Boss and Cut Shaft Hole	321
13.4.3 Create Ribs	322
13.4.4 Add Rounds	324
Chapter 14 Variables and Family of Parts	. 326
14.1 Variables	326
14.1.1 Drive a dimension with a formula and another dimension	326
14.1.2 Drive a dimension with a value from a Microsoft Excel spreadsheet	332
14.1.3 Drive a dimension from a Visual Basic function or subroutine	335
14.2 Family of Parts	337
14.2.1 Define Master File of Family of Parts	337
14.2.2 Populate Family Members	340
14.2.3 Suppressing and Resuming Features	341
14.2.4 Add or Delete Variables	342
14.2.5 Add, Copy, Rename and Delete Family Members	343
14.2.6 Modify a Family of Parts	344
14.3 Project: Flat Slotted Screw	344
14.3.1 Create Flat Slotted Screw	344
14.3.2 Change Variable Names and Add Formulas	346
14.3.3 Create a Family of Flat Slotted Screws	347
14.3.4 Populate Members of Family of Flat Slotted Screws	349
Chapter 15 Feature Edit, Reorder, and Model Roll Back	. 350
15.1 Feature Edit	350
15.2 Feature Reorder	350
15.3 Feature Suppress/Unsuppress	352
15.4 Model Rollback	352
15.5 Project: Ull Pan	333
15.5.1 Create Kim Body and Modify It By Editing Sketch	354
IN NOT PARE UNITER BOOM	
15.5.2 Create Ualea	550
15.5.2 Create Holes	350
15.5.2 Create Holes	350 357 359
15.5.2 Create Holes 15.5.4 Shell The Oil Pan, and Reorder The Thin Wall Before Holes 15.5.5 Insert A Fillet on The Bottom of Oil Pan by Roll Back	350 357 359 361
15.5.2 Create Oil Fail Body 15.5.3 Create Holes	350 357 359 361 364
15.5.2 Create Holes	350 357 359 361 364 364
15.5.2 Create Oil Fail Body 15.5.3 Create Holes 15.5.4 Shell The Oil Pan, and Reorder The Thin Wall Before Holes 15.5.5 Insert A Fillet on The Bottom of Oil Pan by Roll Back Chapter 16 Sheet Metal 16.1 Sheet Metal Settings 16.2 Tab	350 357 359 361 364 364 366
15.5.2 Create Holes	350 357 359 361 364 364 366 367
 15.5.2 Create On Fun Body	350 357 359 361 364 366 366 373 373
 15.5.2 Create On Fun Body	350 357 359 361 364 364 366 367 373 373 373
 15.5.2 Create On Fun Body in 15.5.2 State Holes	350 357 359 361 364 364 364 366 367 373 373 374 378
 15.5.2 Create On Fun Dody	350 357 359 361 364 364 366 367 373 373 373 374 378 379
 15.5.2 Create On Fun Body	350 357 359 361 364 364 366 367 373 373 373 374 378 379 381
 15.5.2 Create Holes	350 357 359 361 364 364 364 366 367 373 373 374 378 379 381 381
 15.5.2 Create Holes 15.5.3 Create Holes 15.5.4 Shell The Oil Pan, and Reorder The Thin Wall Before Holes 15.5.5 Insert A Fillet on The Bottom of Oil Pan by Roll Back Chapter 16 Sheet Metal 16.1 Sheet Metal Settings 16.2 Tab 16.3 Flange 16.4 Contour Flange, and Lofted Flange 16.4.1 Contour Flange – Base Feature 16.4.2 Contour Flange – Add to Part 16.4.3 Hem 16.4 Lofted Flange 16.5 Normal Cutout, Cutout 16.6 Jog 16.7 Bend, Unbend, and Rebend 	350 357 359 361 364 364 364 366 367 373 373 373 374 378 379 381 381 383

16.8 Break Corner, Close Corner	387
16.9 Dimple, Louver, Drawn Cutout, and Bead	389
16.9.1 Dimple	390
16.9.2 Louver	391
16.9.3 Drawn Cutout	394
16.9.4 Bead	396
16.10 Flatten Sheet Metal Part, and Add Features in The Part Environment	398
16.11 Sheet Metal Project:	402
16.11.1 Create a Tab	403
16.11.2 Add a Bend to the Tab	404
16.11.3 Attach Two Flanges on the Side Edges of the Tab	405
16.11.4 Add a Tab to the Front Edge of the Part	406
16.11.5 Create a Jog on the Front Tab	407
16.11.6 Add Two Contour Flanges on the Edge Flanges	408
16.11.7 Create a Rolled Hem on the Tip of The Front Flange	411
16.11.8 Break the Corners and Add Screw Holes	412
16.11.9 Save The Hinge As Flat	415
Chapter 17 Assembly	. 416
17 1 Place Parts or Subassemblies into Assembly	416
17.2 Assembly Relationships	
17.2.1 Ground Mate and Reduced Steps	418
17.2.2 Planar Align	421
17.2.3 Axial Align	
17.2.4 Insert	423
17.2.5 Connect	424
17.2.6 Angle	427
17.2.7 Tangent	
17.2.8 Cam.	430
17.2.9 FlashFit	431
17.2.10 Edit. Delete and Suppress Relationships	432
17.3 Create New Part in-Place	433
17.4 Pattern Parts in Assembly	435
17.5 Create Systems Library	437
17.6 Assembly Layout	440
17.7 Alternate Assemblies	444
17.7.1 Alternate Position Assemblies	445
17.7.2 Family of Assemblies	448
17.8 Exploded Assembly	451
17.8.1 Automatic Explode	451
17.8.2 Explode	452
17.8.3 Adjust Spread Distance	454
17.8.4 Reposition	454
17.8.5 Remove	455
17.8.6 Collapse and Unexplode	455
17.8.7 Add Joggle and Remove Joggle	456
17.8.8 Bind Subassembly, and Unbind Subassembly	457

17.8.9 Move Part	457
17.9 Other Assembly Tools	458
17.9.1 Multi-Part Cutout	459
17.9.2 Capture Fit	460
17.9.3 Move Part	. 461
17.9.4 Replace	463
17.9.5 Transfer / Disperse	464
17.9.6 Show / Hide / Show Only /Activate Part / Inactivate Part	467
17.10 Assembly Project: Mechanic Vise Assembly	469
17 10 1 Assemble Base and Bolt M8 Create Spherical Head Bolt In-Place	472
17.10.7 Assemble Fixed Iaw Washer 8 Lock Nut Lock Handle and Handle	· · · / 2
Head	475
17 10 3 Install Guide Bar, Moyable Jaw, and Washers	481
17 10.4 Add Screw Cotter Pin Handle and Handle Head	484
17.10.5 Install Jaw Plates and Screw M3	/87
17.10.5 Instan saw Flates, and Selew Wishing and	489
Chantar 18 Waldmant	/07
19.1 Cet Weldment Components	402
18.2 Drenare The Components for Welding	492
18.2 Add Wold Doods and Wold Lablas	. 494
10.5 Add weld Beads and weld Lables	. 490
10.5.1 Fillet Weld	497
18.3.2 Label Weld	500
18.3.5 Sulcin weld	502
18.3.4 Construct weld Beads with Protrusion 1001s	503
18.4 Post-weid Machining	504
18.5 Create Feature Patterns and Stand-alone Documents	504
18.6 Create Weldment in Weldment Assembly Environment	504
18.7 Weldment Project: Bearing Support.	505
18.7.1 Build Parts and Assembly	506
18.7.2 Create Preparation Features	511
18.7.3 Add Weld Beads	512
18.7.4 Construct Post-Machining Features	517
Chapter 19 Drawing Template and Views	. 522
19.1 Define Drawing Standards	522
19.2 Create Customized Template	529
19.2.1 Setup Sheet Size and Orientation	530
19.2.2 Add a border to the sheet and construct a title block	532
19.2.3 Add texts, property texts and company's logo into the title block	534
19.2.4 Save the template into the default folder of the Solid Edge	538
19.2.5 Setup The Working Sheet Format	538
19.3 Generate Drawing Views	539
19.3.1 Drawing View Wizard	540
19.3.2 Principle View	544
19.3.3 Auxiliary View	545
19.3.4 Cutting Plane and Section View	546
19.3.5 Broken-Out Section View	550

19.3.6 Detail View	551
19.3.7 Update Views	553
19.3.8 Broken Views	553
19.3.9 Crop Views	554
19.4 Project: Vertical Bearing Support Drawing	555
19.4.1 Sheet Setup and Principle View Creation	555
19.4.2 Create a Top View and a Left View	556
19.4.3 Create a Section View	557
19.4.4 Create an Auxiliary View	558
19.4.5 Create a Detail View	559
Chapter 20 Drawing Detailing	560
20.1 Dimensions	560
20.1.1 Retrieve Dimensions	561
20.1.2 Chamfer Dimension	562
20.2 Annotations	563
20.2.1 Center Line, Center Mark and Bolt Hole Circle	563
20.2.2 Leader and Callout	567
20.2.3 Surface Texture Symbol, Weld Symbol, and Edge Condition	569
20.2.4 Feature Control Frame, Datum Frame, and Datum Target	572
20.2.5 Text	576
20.3 Hole Table	577
20.4 Project: Bracket Drawing	581
20.4.1 Create Drawing Views	581
20.4.2 Retrieve Model Dimensions	583
20.4.3 Add Radius Dimension and Center Lines	584
20.4.4 Add Hole Callouts	585
20.4.5 Add Dimension Tolerance and Surface Texture Symbol	586
20.4.6 Add Text and Property Text	587
Chapter 21 Assembly Drawings	590
21.1 Bill of Materials (BOM)	590
21.2 Balloons	595
21.3 Remove Hatch from Selected Part in Section Views	596
21.4 Project: Mechanic Vise	597
21.4.1 Create Assembly Views	597
21.4.2 Remove Hatch from Some Parts	599
21.4.3 Add Dimensions, BOM, and Balloons	600
21.4.4 Add A Drawing Sheet and An Exploded View	603
