

## III TABLE OF CONTENTS

### I ACKNOWLEDGEMENTS

### II ABSTRACT

### III TABLE OF CONTENTS

1	<b>INTRODUCTION</b> .....	1
2	<b>BACKGROUND</b> .....	3
	2.1 Total hip arthroplasty .....	3
	2.2 Failure modes of total hip arthroplasty .....	7
	2.3 Revision hip joint replacement- methods and problems .....	9
	2.4 Impaction grafting - the surgical procedure .....	11
	2.5 Problems with impaction grafting .....	15
	2.6 Synthetic bone graft .....	19
	2.6.1 <i>Requirements for a synthetic bone graft alternative</i> .....	19
	2.6.2 <i>Commercial and experimental bone graft alternatives</i> .....	21
	2.7 Experimental background .....	26
	2.7.1 <i>The mechanical loading situation</i> .....	27
	2.7.2 <i>Geometry, dimensions and graft quantities</i> .....	30
	2.7.3 <i>Materials: Bone graft - source and preparation</i> .....	31
	2.7.4 <i>Materials: Hydroxyapatite and tri-calciumphosphate</i> .....	36
	2.7.5 Shear test theory .....	41
	2.8 Objectives of work .....	43
3	<b>BONE GRAFT PREPARATION</b> .....	45
	3.1 Human and xenograft bone .....	45
	3.2 Ceramic bone graft extenders .....	49
	3.3 Mixes of bone and ceramic graft extenders .....	52

<b>4 DIE-PLUNGER COMPRESSION TEST</b> .....	54
4.1 Experimental methods .....	54
4.2 Materials .....	56
4.3 Data evaluation .....	58
4.4 Results .....	60
4.4.1 Results - bone grafts .....	60
4.4.2 Results - ceramic graft extenders .....	72
4.4.3 Results - bone graft and ceramic mixes .....	85
4.5 Discussion .....	91
4.5.1 Discussion - bone grafts .....	91
4.5.2 Discussion - ceramic graft extenders .....	95
4.5.3 Discussion - bone graft and ceramic mixes .....	98
4.6 Conclusions .....	101
<b>5 SHEAR TEST</b> .....	109
5.1 Experimental methods .....	109
5.2 Materials .....	112
5.3 Results .....	112
5.4 Discussion .....	116
5.5 Conclusions .....	117
<b>6 OVINE TUBE-STEM MODEL</b> .....	121
6.1 Experimental methods .....	121
6.2 Materials .....	124
6.3 Results .....	125
6.4 Discussion .....	133
6.5 Conclusions .....	136
<b>7 HUMAN SCALED TUBE-CONE MODEL</b> .....	141
7.1 Experimental methods .....	141
7.1.1 General considerations .....	141
7.1.2 Design tube-cone model .....	143
7.1.3 Design impactometer .....	147
7.1.4 Test procedure .....	148
7.2 Materials .....	152

7.3 Results.....	154
7.3.1 Endurance testing.....	154
7.3.2 Torsional stability.....	174
7.3.3 Impaction properties.....	175
7.3.4 Sample retrievals.....	178
7.4 Discussion.....	180
7.4.1 Qualitative subsidence behaviour.....	182
7.4.2 Human and ovine graft.....	183
7.4.3 Bone graft, ceramic grafts and bone/ceramic mixes.....	185
7.4.4 Influence of impaction energy.....	187
7.4.5 Bone/ceramic mixing ratios.....	187
7.4.6 Ceramic properties in bone/ceramic mix.....	187
7.4.7 Torsional stability.....	189
7.4.8 Impaction properties.....	190
7.5 Conclusions.....	191
7.5.1 Model/Experimental conclusions.....	191
7.5.2 Clinically related conclusions.....	194
<b>8 COMPARISON OF MATERIALS' PROPERTIES AND ENDURANCE TESTING</b>	<b>201</b>
8.1 Aim and considerations.....	201
8.2 Results and discussion.....	201
8.2.1 Shear properties.....	201
8.2.2 Compression properties.....	202
8.3 Conclusions.....	207
<b>9 SUMMARY</b> .....	<b>209</b>
<b>10 GLOSSARY</b> .....	<b>212</b>
<b>11 REFERENCES</b> .....	<b>213</b>
<b>12 ILLUSTRATIONS</b> .....	<b>224</b>
<b>13 APPENDIX</b> .....	<b>232</b>
