

## **BSAC Administrator's Report 2009**

The main activity performed this year was the processing of all the annual BSAC membership applications. At present we have approximately 40 BSAC members and I am pleased to report that most paid & returned their annual BSAC membership application forms efficiently. As usual there were one or two late returnees. The only real impact here is that returns means more work for the BSAC administrator combined with an unnecessary delay in BSAC issuing membership cards. Even chasing people up for their forms does not seem to help and indeed it is clear that some memberships laps through lack of motivation! We have had a few cases where members have made their BSAC payments BUT because they do not get around to completing the paperwork BSAC cannot renew their membership!

This past year I am though, pleased to report that we gained 6 new BSAC members, which offset the number we lost. Four of the new members are undertaking training within the club. The other two being fully qualified divers. Sadly the losses, this year, included one of our instructors, who has decided to "hang up his regulators". We can expect to lose one more instructor, later this year, as he is considering leaving the Netherlands, due to work & family commitments.

On a good point we have at least 4 members training as instructors and another 3 members undertaking Dive Leader instruction.

Best Regards
