

Equipment Officers report 2008-2009

There has been virtually no purchasing done on behalf of the club this year. The proposal to commence rationalisation of the club's equipment has been put on hold as the current level of equipment is deemed sufficient for the intermediate future. Consequently the planned rationalisation programme will be implemented on a case-by-case basis as equipment needs replacement. However, two SMBs were purchased and it is the intention to purchase two reels for these.

Indeed, it is now the intention to dispose of some of the more non-standard items of equipment; principally the Buddy Tec wings and the Aqua-Lung Spiro regulators. These will be offered as sale items to club members.

In addition, there are still several wet suits of various styles and sizes "parked" in the dive hut. These will be disposed of within the next few weeks.

It is planned to reorganise the club hut and build racks for the cylinders as well as proper stowage for the regulators. This will require some civil engineering effort and assistance will not be refused.
