## Epilogue

*A year has passed by, yet the memories are as fresh as ever. The great times we had shared, the wonderful moments together are vividly ringing within our soul. It seems as if his laughter is echoing somewhere deep within our laughter and his smile is manifesting over our smiles. Though nothing remains of the flesh and blood, he will always reign within our heart, mind and soul.*

*He died young. He was blessed with God's love too soon. He was a man with real talents. Wonder why God took him away too early. The world needs such men more than Heavens does. Nevertheless, within the short life he lived, he gave the world the best of himself, much more than anyone could give in their lifetime.*

*He was great friend of ours, and he will always remain to be the greatest. He really was a true friend that unbosomed freely, advised justly, assisted readily, adventured boldly, took all patiently, defended courageously, and always continued to be a friend unchangeably.*

*We really miss you, Mitra.*
