ACTIVITY 4: WHO SAID RECYCLING IS BORING?

NAME: 1)……
2)……..

IN THE LAB – session 1

Your friend, Maria, and you had an argument yesterday. She said that you could never create something new and useful from old stuff, and that you should immediately throw away all the old things that you found in the storage room as you were cleaning it. You tell her that she is wrong and that the following day you will prove to her that she is wrong. When you return home, you open your PC and surf in the Internet to find a site to help you. In the end you find these sites:

http://kid-at-art.com/htdoc/lesson17.html
http://kid-at-art.com/htdoc/precraf.html

go through them carefully, and choose 2 crafts that you find the most interesting. Take notes on:

- how to make them (material and process of construction)
- What they can be used for

and create *'recipes'* Maria should follow to make them, in order to be convinced that **recycling** is not only **possible** but that it is really **fun**!!!

If you want to, you can make them yourselves!

Now ***take notes*** in the space provided below!
