Remainder on Project Work– Web site for teaching and learning

You or your group should design and construct a web site for educational purpose. The site should aim to be constructed for students to have a web-based learning experience. Moreover, the site should contain several pages with the following content:

1. Presentation or self learning materials
2. Use of Multimedia elements and animations
3. Interactive materials for on-line test self assessment, e.g. On-line test, mailto and fill-out Forms, etc..

All materials should be presented in a well-organized manner. Besides web authoring skill, web design technique also occupies a portion of the total mark. Marking criteria include:

- ✧ Use and production of multimedia elements
- ✧ Planning and design of the web site
- ✧ Practical consideration on web site construction
- ✧ Presentation using special constructs such as frames, links and anchors, list and tables and embedding for enriching information
- ✧ Design factors for presenting information on the Internet
- ✧ Use of static and dynamic web pages

The project should be hosted in the server 137.189.165.62.

Deadline: 29th April, 2005
