

# The Moving Crust

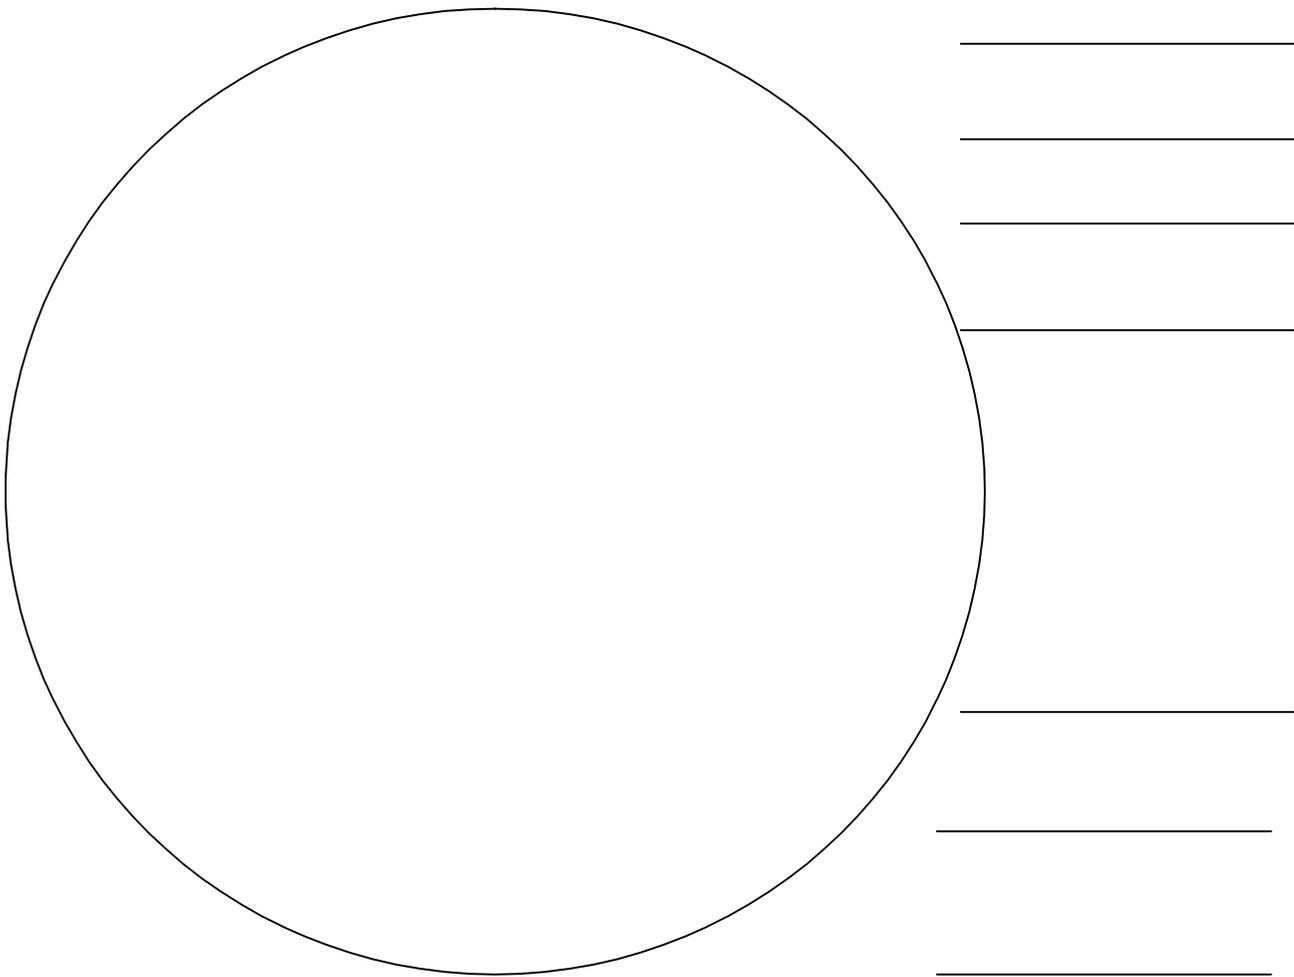

## Assignment #1 Layers of the Earth

NAME: \_\_\_\_\_

Instructions: Answer all questions in the spaces provided. Due: \_\_\_\_\_

1. **Draw and colour** the layers of the earth and label them. You will lose marks if they are not close to the correct thickness in relation to each other. I know that you can't get the crust to scale because it is so thin.

(Continental crust, oceanic crust, mantle, outer core and inner core)

2. Label the **lithosphere** and **asthenosphere** on the above diagram.

### Feedback

- poorly labelled
  - unclear lines
  - not completed on due date
  - layers are not to scale
  - showed little understanding of earth layers
  - parent signature requires
- \_\_\_\_\_

- labelled correctly
- used straight edge
- completed on due date layers fairly accurate
- showed good understanding of earth layers

- neatly labelled and correct
- used straight edge
- complete with detail scale is accurate
- showed great understanding of earth layers
