One item that I am requesting that you get before our first meeting is a USB Flash Drive (See picture below) preferably with at least 512 MB. You do not have to have one, but it will come in super handy. One thing we will focus on is creating a totally portable productivity environment that can run off of the USB drive. You can find one at any computer store, Wal-Mart, Target, Sam's Club, Frye's, Brands Mart, etc. If you shop around you can find one for under \$10!

I have set up a website for us to use as well. The infrastructure is in place, so you can check it out at

I am looking forward to a great time and I hope you are too!

Happy Computing,

*Mr. Gresens*
