

Intel Santa Clara Softball League

Last Updated October 29, 2003

The Intel Santa Clara Softball League (ISCSL) is the local governing body of softball at Intel Corporation. As part of an effort to maintain the safest environment for the most players in a predominantly recreational league, the ISCSL regulates the equipment that is approved for use within Intel league play.

ISCSL routinely syncs compliance with the Twin Creeks Sports Complex, the Amateur Softball Association of America (ASA), and the opinions of the active softball team managers within the league.

As a general guideline, the following bat characteristics will be categorically banned in ISCSL league play:

- Multiple-wall bat designs, regardless of manufacturer (double wall, tri-shell, etc)
- Bats made of, or containing the following materials:
Titanium, Scandium, TIMETAL 15-3, Teledyne 15-333 or SC500
- Bats exceeding 1.20 BPF

Until further notice, bats of the following models are specifically no longer allowed in ISCSL league play:

<u>Manufacturer</u>	<u>Model</u>	<u>Manufacturer</u>	<u>Model</u>
DeMarini	375 MX	Worth	3DX
