

WATER

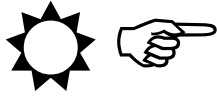

[INTRO]

[Verse]

It was the summer of 1999
It was hot and it was dry
In the office, the coolers ran dry
They were emptied one by one
The workers began to walk around
With dry cups and not a sound
They searched for clear water
But none was to be found

{CHORUS}

I've been to an office
Where the coolers ran dry
And thirst was all around
In the office
You can you can fill your cup
As long as it don't come
From the ground
La La La La La La
La La La
La La
La La La La La La
La La La
La La

WATER

[2'nd Verse]

The workers began to question
Why all the coolers had run dry
It seems a new Corporate direction
bent on saving the bottom line
And a story was told about a tap that flowed
in a sink 400 feet ahead

{CHORUS}

[BRIDGE]

[3'rd Verse]

After four days there came a loud plea
From the workers who would not pay
And drink fluids from an uncertain source
Or from vending machines
Well the screams were heard
All through the rooms
From those who would not yield
Until the coolers were once again refilled
And the water flowed sweet and pure

{CHORUS}

[End]
