

The Earth's field

This is how Gemma hung a magnet from a piece of string.

These statements are wrong.
Circle the mistake in each one.
Write the correct statement.

When Gemma holds the magnet it will spin round until it points west.

- b The south pole of the magnet will point to the Earth's north pole.

Are these sentences *true* or *false*?

- a Racing pigeons have tiny magnets in their heads which help them find their way home.
- b Some rocks are magnetic and can make a compass point the wrong way.
- c The inside of the Earth behaves like a giant magnet.

The dark end of the compass needle points north.

Label the arrows which point to the north, south, east and west.
