

# OUR BIOLOGICALLY FORMULATED PRODUCTS COVER A WIDE RANGE OF APPLICATIONS

## GREASE TREAT

Biologically digest the F.O.G. in grease traps, drains and sewer lines. Avoid grease accumulation inside drains and reduces drain back-up, frequent pumping of GREASE TRAP. Eliminates noxious odors and reduces H<sub>2</sub>S gases.

Application of GREASE TREAT in lifting stations and pumping sumps, break up scums and grease mat, reduces grease build-up and noxious odors.

## LAGOON TREAT

Decomposition and digestion of sludge buildup in wastewater treatment lagoon and sludge ponds. Prevent algae growth, improve water clarity. Reduces malodor, B.O.D resulting from unbalanced anaerobic activity.

## POND TREAT

Reduces sludge sediments, decayed leaves, dead algae, waste and unfinished food accumulated at the bottom of recreation ponds, golf courses, water ponds etc. Eliminates noxious odors and reduces H<sub>2</sub>S gases. Restores pond aesthetics and ecology balance. Keeps ponds clean and clear, improves water quality and prevent algae growth.

## WASTE TREAT

Enhance treatment plant performance, reduces bottom sludge, BOD, COD, TSS in rural sewage treatment plant. Eg oxidation ponds, anaerobic lagoon and sludge tanks. Eliminate malodors, H<sub>2</sub>S gases. Keeps ponds clean and clear.

## Application of BIO TREAT Bacterial Products
