

puppy schedule

Depending on when you pick up your new puppy (between 9 and 10 weeks is *Hammerhead Kennels* norm) the following schedule will have been followed:

1 DAY • Overall Health/Vet Check for Dam & Pups

3 DAYS • Vet removal of dew claws, 2nd check-up

2 WEEKS • Worming

3 WEEKS • Worming

4 WEEKS • Worming

5 WEEKS • Worming / Optional Measles Shot

6 WEEKS • 4 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo);
Worming

8 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)
• Worming
• Optional Bordetella Vaccination

10 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)
• Worming

Once you bring your new puppy home, the following schedule will ensure a healthy life:

12 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona);
• Optional Bordetella Vaccination
• Optional Lyme Vaccination
• Now is also the optimum time for an ear crop, if you desire. Please call or email us with any questions, we'd be happy to recommend/refer/find a vet in your area

16 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)
• Rabies Vaccination
• Worming
• Optional Lyme Vaccination
• Optimum time for Obedience Training

20 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)

24 WEEKS • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)
• Heartworm Test
• Start monthly flea/tick/heartworm regimen

1 YEAR* • 5 in 1 Vaccination (Distemper, Adenovirus/Parainfluenza, Leptospirosis, Parvo, Corona)
• Rabies Vaccination
• Heartworm Test

4 YEARS • Rabies Vaccination

7 YEARS • Rabies Vaccination

* Note: After 1 year of age, give booster 5 in 1 Vaccination every six months.
