

Ancients – old race. They explored and used the stargates to seed the galaxy with humans. Eventually came across a sleeping race, the Wraith. They woke them and, due to arrogance, were unable to contain them. The Wraith laid siege for several years before the ancients decided to abandon the Pegasus galaxy, putting their city to sleep and sinking it under the water to protect it. The few survivors retreated through the stargate to Earth where they lived out their lives among the humans, presumably mating with some of them since some humans carry the Ancient gene. There may still be survivors out there somewhere.
