## Notes: Microevolution

What is microevolution?

Evidence of microevolution:

- **Natural Selection:**

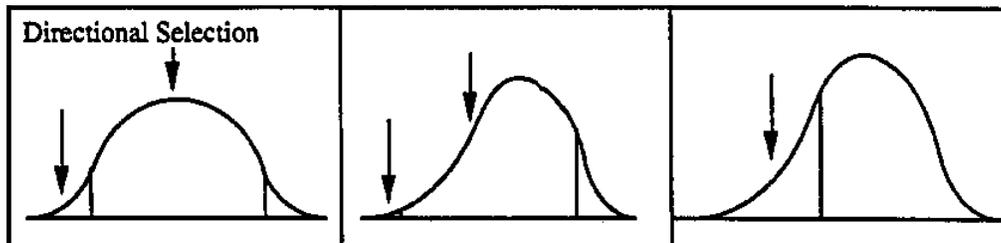

- Observation #1:
- Observation #2:
  - CONCLUSION #1:
- Observation #3:
  - CONCLUSION #2:
- Observation #4:
  - CONCLUSION #3:

- Examples of Natural Selection (Peppered Moths and Cockroaches)

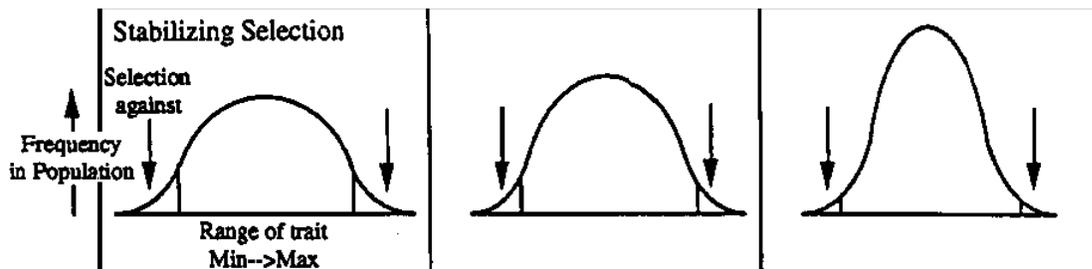

- Three ways that natural selection can influence populations

1. Directional Selection

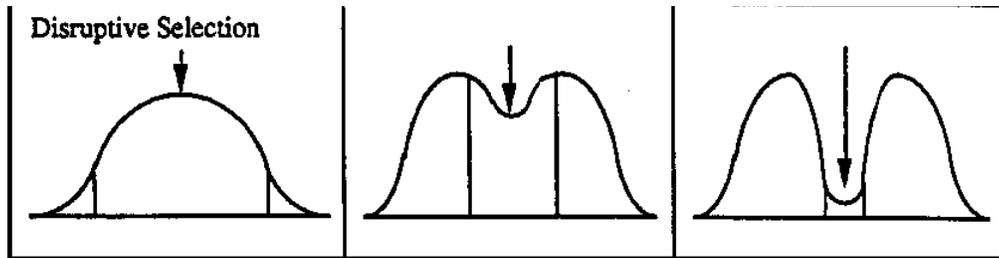

- Example:

2. Stabilizing Selection

- Example:

3. Disruptive Selection

- Example:
