To Whom It May Concern:

I recently had the pleasure of being Trung Nguyen's supervisor for a year at Isothermal Systems Research Advanced Development. I truly enjoyed working with Trung and he was a consistent hard worker with a great work ethic. He was willing and able to learn any technology that we put in front of him and had the ability to work with our diverse department, including the shop, assembly, and mechanical engineers.

I was saddened when the company was restructured and his position was eliminated, because he was a valuable addition to the team. I have every confidence that Trung will be a similar asset at any company that is lucky enough to hire him. Please feel free to call me directly if there is any more information that I can provide.
