

OFFICIAL CHECKLIST OF TRINIDAD & TOBAGO

The official list of species of Trinidad & Tobago stands at 468 as at Jan 2008. This list is updated periodically to reflect additions brought about by the significant increase in coverage by both local and visiting birdwatchers to our islands.

This list comprises two components

- (a) species adjudged as correctly identified by the Trinidad & Tobago Rare Birds Committee since September 1995 and occur naturally or have a sustainable breeding population
- (b) species adjudged acceptable by Richard French prior to the TTRBC's inauguration.
